

environmental, sustainable, responsible

Remanufactured Toner Cartridges Print Extra Pages at No Extra Cost

Introducing ESR

A premium quality remanufactured laser toner cartridge which will lower your environmental impact and significantly reduce print costs.

The range of ESR remanufactured toner cartridges offers a unique combination of high quality, consistent performance and cost saving. All the products are remanufactured and not copy or clone products. The products are manufactured to meet or exceed OEM standards. The production site is one of the most modern in the industry and rigorous quality control ensures that the product meets or exceeds the highest benchmarks for remanufactured products in the industry with a unique closed loop environmental solution.

Our Goal

To produce consistent and high-quality remanufactured toner cartridges that reduce end user costs and help protect the environment.

Extra saving- ESR cartridges deliver page yields equal to or significantly better than the listed OEM yields- which results in lower cost per page on all ESR cartridges compared to the listed OEM's.

Accreditations & Standards

Our manufacturing plant complies with all the relevant standards and has all the required accreditations:
ISO 9001, ISO 14001 and OHSAS 18001.

ISO 9001 has become a basis for systems for Quality Management in industries all over the world. This standard of quality defines the requirements and expectations that must be met by suppliers and producers.

ISO 14001 is an international accepted standard that determine environmental objectives and compliance with all legal requirements. This standard is a balance between economic efficiency and environmental protection.

The OHSAS 18001 standard indicates the method of setting up a health and safety at work management. The goal is to achieve better risk management to reduce the number of accidents, comply with legislation and improve performance.

ISO/IEC 19752 (monochrome Laser cartridges) and ISO/IEC 19798 (color Laser cartridges) are industry standards for determining the page yield of monochrome and color toner cartridges.

environmental, sustainable, responsible
